

Remote**Potato**

Remote Potato HD now in App Store – is this the iPad's best streaming App?

Never Sync your iPad Again Take all your media with you, everywhere. This streams EVERYTHING!

Now you can enjoy **all** your home media, without syncing, wherever you are. Watch **videos**, stream **music**, view **pictures**, all in one app. Streamed live from your home PC over the Internet, over 3G or WiFi. Remote Potato is already the App Store's best-kept secret. **Consistently rated 4-5 stars***, it's a bit like 'Air Video' on steroids! You can even **send your movies to a television** thanks to full support for AirPlay and Apple TV.

(full screenshots on next page)

Key Features:

- Stream **music, pictures and videos** from a home PC to the iPad, over the Internet.
- Most major **video formats** supported; streamed in near-HD quality**
- **AirPlay Support** – stream your stuff directly to a **television** using an **Apple TV**.
- **No more syncing!** Browse your home music library, listen to songs streamed direct from your PC.
- View your home **photo library**; download or email pictures to friends.
- **Sync** up albums and songs for offline access.

Windows 7 Media Center users can also:

- Browse the **TV Guide** and **schedule recordings**.
- Manage existing **recordings**
- Watch previously recorded **TV shows**; *Remote Potato was the first app in the world to directly stream WTV recorded TV files to iOS.*
- Use an AppleTV as a \$100 Media Center Extender – play HD content for the first time.

Press Quotes - Remote Potato Server / iPhone App

"There just isn't anything else like this out there...I didn't hesitate to purchase..." - TekZilla

"...a great app.. ..this makes me happy!" - HD Nation

"...really impressive" - LifeHacker

Editors' Notes

Remote Potato HD for iPad is available from the App Store priced at \$6.99 (US) / £3.99 (UK) (Tier 7)

- Free server software required – download from remotepotato.com Runs on Windows XP SP3, Vista or Windows 7.

* - Review ratings of Remote Potato for iPhone are based on official App Store rating as of 5th July 2011.

** - Streaming quality is subject to available bandwidth, compatible video files and specifications of home PC. Minimum system requirements and further details available at www.remotepotato.com Video streaming over a 3G network is limited to lower qualities (although still produces excellent results) in order to comply with Apple's rules regarding 3G bandwidth consumption.
